Issue:

Unable to race under STCA rules as DLRA rule for OEM tires has not been amended to STCA rules

Relevant Rule: Section 7.B.10 Page # 48

Desired Outcome:

Be able to continue to race with Vespa scooter in production classes.

Reason change is necessary:

The 15 inch rule unfairly bans a class of vehicle

What are the side effects? (Example: 20 new classes, records voided, etc)

No side effects, as safe wheel speeds are governed
more effectively and fairly under tire speed (7.B.8)

Desired Rulebook (re) wording:

"Wheels shall have a minimum nominal diameter of
15 in. except in the Sidecar and Streamliners classes,
or if OEM"

Forward this form to Rules Committee Co-Ordinator listed in DLRA Rulebook.

Note* You may be required to research and develop information concerning the effects of this proposed change.
